Radiation Oncology Standards

Radiation Oncology Standards Update

In a long-awaited development, the Radiation Oncology Standards for practices have been ratified by the Tripartite Committee (comprised of the Faculty of Radiation Oncology, the Australian Institute of Radiography and the Australasian College of Physical Scientists and Engineers in Medicine). A total of 16 Standards were developed. The Australian Government is currently funding a 15 month pilot implementation project which commenced in July 2009. The Standards pilot is being conducted across 15 sites in Australia and is managed by the National Association of Testing Authorities (NATA). Further updates on the pilot will be provided in 2010 editions of Faculty E-news.

A copy of the Standards document used for the pilot is available from the [College Document Library](#)

Invitation to hear Charles "snuffy" Myers speak

The Urological Society of Australia and New Zealand has extended an invitation to NSW radiation and medical oncologists to attend their February 2010 meeting with Charles "snuffy" Myers.

Dr Myers is a prostate cancer 'guru' and this is an opportunity not to be missed. The meeting is being held on:

Tuesday 9 February 2010

Waterview Convention Centre
Olympic Park, Sydney

6 pm Registration and buffet dinner
6.30 pm Program start
